

WORKSHOP AGENDA

FEBRUARY 21, 2006

**CITY OF TREASURE ISLAND, FLORIDA
COMMISSION WORKSHOP SESSION
FEBRUARY 21, 2006
IMMEDIATELY FOLLOWING REGULAR COMMISSION MEETING**

Welcome to the City of Treasure Island Commission Meeting. If you wish to speak on a topic that is on this evening's agenda, a speaker's form [available in the rear of the room] must be completed and given to the City Clerk. Please do not address the Commission from your seat, but rather from the podium where your comments can be heard by all and recorded as required by Florida law. Unscheduled topics may be presented under the Public Comments section of the agenda.

I. DISCUSSION ITEMS:

1. Donation of Equipment to Fire Department from the T. I. Volunteer Fire Department
2. Basis of Design Report, Lift Station #3
3. Proposed Design & Construction Administration Fees, Master Pump Station Rehabilitations
4. Crosswalks – Public Education

II. OLD BUSINESS:

III. CITY MANAGER/CITY ATTORNEY REPORTS AND COMMENTS:

IV. REPORTS & COMMENTS BY COMMISSIONERS:

V. PUBLIC COMMENTS:

VI. ADJOURNMENT:

Any person desiring to file an appeal to any action taken by the Commission at this meeting will need a record of the proceedings and for such purpose may be required to insure that a verbatim transcript is made. Said transcript shall be made by the appellant at his or her expense. The City maintains a tape recording of all public hearings. In the event that you wish to appeal a decision, the tape may or may not adequately insure a verbatim record of the proceedings. Therefore, you may wish to provide a court reporter at your expense.

Any person with a disability who needs any accommodation in order to participate in this proceeding is entitled to assistance at no cost. Please contact the office of the City Clerk in writing at 120 – 108 Avenue, Treasure Island FL 33706 or by phone at 727 547 4575 at least two working days prior to the meeting to advise what assistance is needed.

CITY OF TREASURE ISLAND AGENDA COVER MEMORANDUM

Agenda Item #: *E-1*
Meeting Date: 2-21-06

SUBJECT: EQUIPMENT DONATION BY TREASURE ISLAND VOLUNTEER FIRE DEPT.

RECOMMENDATION: ACCEPT DONATION OF EQUIPMENT FOR FIRE DEPT.

SUMMARY:

At the February 13, 2006 business meeting of the Treasure Island Volunteer Fire Dept., the members agreed to purchase the following equipment for the Fire Department:

- Two gasoline-powered positive pressure ventilation fans
- Two electric-powered positive pressure ventilation fans
- Four tripods for floodlights (floodlights were donated in 2005)
- Replacement chairs and tables for meeting room

The funds for this equipment are made possible through the generous contributions to the Volunteer Fire Department by residents, visitors, and businesses of Treasure Island.

MOTION TO ACCEPT DONATION

I move to accept the donation of

Two gasoline-powered positive pressure ventilation fans

Two electric-powered positive pressure ventilation fans

Four tripods for floodlights (floodlights were donated in 2005)

Replacement chairs and tables for meeting room

from the Treasure Island Volunteer Fire Department to the Treasure Island Fire Department. Motion was made by Commissioner and seconded by Commissioner

. Upon roll call, the vote was unanimous.

Passed this 7th day of March 2006.

Mary Maloof, Mayor

ATTEST:

Dawn Foss, City Clerk

**CITY OF TREASURE ISLAND
AGENDA COVER MEMORANDUM**

Agenda Item #: *E2*
Meeting Date: 2/21/06

SUBJECT: BASIS OF DESIGN REPORT, LIFT STATION #3

RECOMMENDATION: APPROVE THE PERFORMANCE OF A BASIS OF DESIGN REPORT BY ADVANCED ENGINEERING & DESIGN ON LIFT STATION #3 IN THE AMOUNT OF \$11,270.00.

SUMMARY: Lift Station #3 is located in the intersection of 99th Ave. and 1st St. E. and accepts flows from Lift Stations 1 & 2 and pumps the discharge into the gravity sewer interceptor line in Gulf Blvd. LS #3 has two, 5 HP pumps, but has been experiencing high wet well volumes over the past two years. DPW believes that the replacement of the two 5 HP pumps with two, 10 HP pumps (and the necessary ancillary controls) would solve the problem; however, considerations of existing wet well volume and structural stability, as well as the size and condition of the discharge line and the adequacy of the existing electrical system have kept us from attempting the replacement due to its discharge into Gulf Blvd. The purpose of this investigation and report is to address the issues raised above and determine the feasibility of making LS #3 improvements at this time. The attached Scope of Work and man-hour estimates are provided as back-up for the cost estimation.

RESOLUTION NO. 06-

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF TREASURE ISLAND APPROVING THE PERFORMANCE OF A *BASIS OF DESIGN REPORT* BY ADVANCED ENGINEERING & DESIGN ON LIFT STATION #3 IN THE AMOUNT OF \$11,270.00.

WHEREAS, Lift Station #3 located at the intersection of 99th Avenue and 1st Street East has been experiencing high wet well volumes over the last two years; and

WHEREAS, an investigation and report is recommended at this time to address the problem at Lift Station #3 to determine the feasibility of making Lift Station #3 improvements; and

WHEREAS, the Commission has previously approved the firm of Advanced Engineering and Design as the City's Engineer of Records to prepare said reports; and

WHEREAS, staff is recommending the Commission approve the performance of A *Basis of Design Report* by Advanced Engineering and Design on Life Station #3 in the amount of \$11,270.00

NOW, THEREFORE, THE CITY COMMISSION OF THE CITY OF TREASURE ISLAND DOES RESOLVE:

To approve Advanced Engineering and Design to prepare the performance of A *Basis of Design Report* on Lift Station #3 to determine the feasibility of making improvements in the amount of \$11,270.00.

The foregoing Resolution was offered during the Regular Session of the City Commission of the City of Treasure Island, Florida, sitting on the 7th day of March, 2006 by Commissioner who moved its adoption, was seconded by Commissioner and upon roll call the vote was:

Advanced Engineering & Design
WORK ORDER INITIATION FORM
CITY OF TREASURE ISLAND
PUMP STATION NO. 3 REHABILITATION
DESIGN and CONSTRUCTION ADMINISTRATION SERVICES

I. SCOPE OF SERVICES

The City of Treasure Island's Pump Station No. 3 at the intersection of 99th Avenue and 1st Street East. This submersible duplex station has recently had additional flows directed to it and is currently undersized to accommodate these flows.

The City of Treasure Island, herein referred to as "CITY", would like to rehabilitate this pump station after analyzing the current flows into the facility. The rehabilitation method will consist of the replacement of the pumps and other electrical controls and the replacement of piping, valves and fittings as deemed necessary.

II. SCOPE OF WORK

The purpose of this project is to perform an evaluation of this facility. Involved in the proposed scope of services are several specific tasks. Each of these tasks is presented below with a description of the work that will be accomplished under each. Deliverables are indicated where applicable.

1.0 Data Collection/ Review

- 1.1 The ENGINEER shall attend one (1) pre-design meeting with the CITY to review all available information on the existing pump station.
- 1.2 The ENGINEER shall conduct a site investigation at the lift station, coordinate the identification of private utilities (Florida Power Corporation, Verizon and cable television companies, etc.) in the vicinity of the lift station and collect topographic survey information at the lift station site.
- 1.3 The ENGINEER shall prepare base drawings from a review of the existing lift station drawings and from the topographic survey.

2.0 Preliminary Design

- 2.1 The ENGINEER shall illustrate the conceptual design on the base drawings and compile manufacturer's data on Flygt submersible sewage pumps. The ENGINEER shall perform a hydraulic analysis of the lift station and develop a system curve and a design pumping rate.

- 2.2 The ENGINEER shall prepare and submit four (4) copies of a Basis of Design Report to include:
- a. conceptual design drawings as compiled from record drawings and field measurements,
 - b. results of flow monitoring and hydraulic analyses, including system curves and pumping requirements,
 - c. cost estimates.
- 2.3 The ENGINEER shall attend one (1) meeting with the CITY to review the Preliminary Plan Submittal and document changes requested by the CITY, as required. The ENGINEER shall prepare meeting minutes.

III. SCHEDULE

<u>Task</u>	<u>Description</u>	<u>Number of Weeks for Completion (excluding Review Time)</u>
1.0	Data Collection / Review	3
2.0	Preliminary Design	4

IV. CITY RESPONSIBILITIES

The CITY will provide the following for the ENGINEER:

1. Copies of all available maps, plats, aerial photographs, record drawings, operating logs, maintenance files and other available information and data pertinent to the project design;
2. Personnel and equipment to provide access during site inspections and draw down testing;
3. Distribute Basis of Design Reports to CITY Departments, as necessary;
4. Provide City staff reviews;

V. ENGINEER'S COMPENSATION

For the detailed Scope of Work described under Tasks 1 and 2 above, the CITY will compensate the ENGINEER on a Lump Sum, Not-to-Exceed price basis in the amount of \$ 11,270.00.

VI. STAFF ASSIGNMENT (Consultant):

William Reidy, P.E.

Daniel Stowers, P.E.

VII. SPECIAL CONSIDERATIONS

I hereby certify as a licensed Professional Engineer, registered in accordance with Florida Statute 471 (481) that the above project's site and/or construction plans, to the best of my knowledge, information, and belief, will meet applicable design criteria specified by City municipal ordinance, State, and Federal established standards. I understand that it is my responsibility as the project's Professional Engineer, to perform a quality assurance review of these submitted plans.

AGENDA COVER MEMORANDUM**

Agenda Item #: *£3*
Meeting Date: 2/21/06

SUBJECT: PROPOSED DESIGN & CONSTRUCTION ADMINISTRATION FEES, MASTER PUMP STATION REHABILITATION

RECOMMENDATION: THE COMMISSION APPROVE THE PROPOSED DESIGN & CONSTRUCTION ADMINISTRATION FEES FOR THE MASTER PUMP STATION REHABILITATION, AS OUTLINED IN THE PROPOSED SCOPE OF WORK, TO ADVANCED ENGINEERING & DESIGN IN THE NOT TO EXCEED AMOUNT OF \$90,710.00.

SUMMARY: The Commission previously approved the firm of Advanced Engineering & Design (AED) to be the City's waste water and storm water Engineer of Record. This is the first contract to be issued to AED and deals with the use of the Federal EPA grant of \$500,000 and the possible SRF loan of \$1.4M to upgrade various aspects of the City's wastewater collection system. The original Federal grant was to be used for the replacement of the Master Control Center at the MPS and that effort was estimated at \$500,000. However, the \$500,000 grant can only be 55% of the total project cost, so we have decided to add an upgrade to the odor control system and the replacement of the old emergency generator to this to bring this total project cost nearer to the \$880,000 necessary to take advantage of the full grant. The design fee for this project (see attached Scope of Work & Estimate) is \$67,759.00 or, approximately 7.7% of the estimated construction cost. The CA cost is \$22,951, or approximately 2.6% of the estimated construction costs.

RESOLUTION NO. 06-

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF TREASURE ISLAND APPROVING THE PROPOSED DESIGN AND CONSTRUCTION ADMINISTRATION FEES FOR THE MASTER PUMP STATION REHABILITATION TO ADVANCED ENGINEERING & DESIGN IN THE NOT TO EXCEED AMOUNT OF \$90,710.00.

WHEREAS, the City Commission did previously approve the firm of Advanced Engineering & Design to be the City's waste water and storm water Engineer of Record; and

WHEREAS, this is the first contract to be issued to Advanced Engineering and Design and deals with the use of Federal EPA grant monies of \$500,000; and

WHEREAS, the original Federal grant was to be used for the replacement of the Master Control Center at the Master Pump Station estimated at \$500,000; and

WHEREAS, the \$500,000 grant can only be 55% of the total project cost; and

WHEREAS, administration recommends adding an upgrade to the odor control system and replace the old emergency generator to this to bring this total project cost nearer to the \$880,000 necessary to take advantage of the full grant; and

WHEREAS, administration is recommending the City Commission approve the proposed design and construction administration fees for the Master Pump Station rehabilitation as outlined in the proposed scope of work to Advanced Engineering & Design in the not to exceed amount of \$90,710.00.

NOW, THEREFORE, THE CITY COMMISSION OF THE CITY OF TREASURE ISLAND DOES RESOLVE:

To approve the proposed design and construction administration fees for the Master Pump Station rehabilitation as outlined in the proposed scope of work to Advanced Engineering & Design. The total cost of this project is not to exceed \$90,710.00.

The foregoing Resolution was offered during the Regular Session of the City Commission of the City of Treasure Island, Florida, sitting on the 7th day of March, 2006 by Commissioner who moved its adoption, was seconded by Commissioner and upon roll call the vote was:

**Advanced Engineering & Design
WORK ORDER INITIATION FORM
CITY OF TREASURE ISLAND
MASTER PUMP STATION REHABILITATION
DESIGN and CONSTRUCTION ADMINISTRATION SERVICES**

I. SCOPE OF SERVICES

The City of Treasure Island's Master Pump Station is located adjacent to City Hall at 108th Avenue and Gulf Boulevard. This dry pit-wet pit triplex facility currently serves a significant service area, re-pumping flows from Lift Station Nos. 1 through 3 and 6 through 10, inclusive.

The City of Treasure Island, herein referred to as "CITY", would like to rehabilitate this pump station. The rehabilitation method will consist of the replacement of the pumps and other electrical controls, the addition of variable frequency drives, the replacement of the stand-by generator and odor control system.

II. SCOPE OF WORK

The purpose of this project is to develop the design for this facility. Involved in the proposed scope of services are several specific tasks. Each of these tasks is presented below with a description of the work that will be accomplished under each. Deliverables are indicated where applicable.

1.0 Data Collection/ Review

- 1.1 The ENGINEER shall attend one (1) pre-design meeting with the CITY to review all available information on the existing pump station. Most if not all of this information may have already been collected during the Basis of Design phase.
- 1.2 The ENGINEER shall conduct a site investigation at the lift station, coordinate the identification of private utilities (Florida Power Corporation, Verizon and cable television companies, etc.) in the vicinity of the lift station and collect topographic survey information at the lift station site.
- 1.3 The ENGINEER shall coordinate the collection of air samples for the purpose of evaluating the current odor characteristics and to design the most cost-effective system.
- 1.4 The ENGINEER shall prepare basic drawings from a review of the existing lift station drawings and from the topographic survey.

2.0 Preliminary Design

- 2.1 The ENGINEER shall illustrate the conceptual design on the base drawings and compile manufacturer's data on Flygt submersible sewage pumps. The ENGINEER shall perform a hydraulic analysis of the lift station and develop a system curve and a design pumping rate.
- 2.2 The ENGINEER shall schedule meetings with contractors to begin the development of budgetary construction costs.
- 2.3 The ENGINEER shall prepare and submit eight (8) copies of a Basis of Design Report to include:
 - a. conceptual design drawings as compiled from record drawings and field measurements,
 - b. results of flow monitoring and hydraulic analyses, including system curves and pumping requirements,
 - c. cost estimates.
- 2.4 The ENGINEER shall attend one (1) meeting with the CITY to review the Preliminary Plan Submittal and document changes requested by the CITY, as required. The ENGINEER shall prepare meeting minutes.

3.0 Intermediate/ Final Design

- 3.1 Based on the Preliminary Design, the ENGINEER shall prepare and submit eight (8) sets of Intermediate Plans (60% complete) indicating the proposed pump station configuration. The plans will include:
 - a. Demolition of portions of the existing facility
 - b. Equipment layout
 - c. Electrical / Instrumentation layout
 - d. Generator placement
 - e. Site work and yard piping
 - f. Typical details

The ENGINEER will coordinate with an electrical subconsultant for the design of the electrical service, generator and control system.

- 3.2 The ENGINEER shall develop architectural details for the addition of a controlled air room or enclosure to house the pump controls.
- 3.3 The ENGINEER shall prepare and submit with the Intermediate plans, an updated opinion of probable construction cost and technical specifications. Plans will also be distributed to the private utility companies for verification of the location of their respective systems.

- 3.4 The ENGINEER shall prepare technical specifications and review existing City "front-ends" or develop the same.
- 3.5 The ENGINEER shall attend one (1) meeting with the CITY to review the Intermediate plans and to document requested plan revisions and shall prepare meeting minutes.
- 3.6 Based on the Intermediate plan review, the ENGINEER shall prepare and submit eight (8) sets of Draft Contract Documents (90% complete) which shall include the following:
- a. Plans with sections and details
 - b. Pump specifications referencing a model number and impeller size for the following manufacturer: Flygt
 - c. Technical specifications for all pump station components

The ENGINEER shall submit two (2) sets of signed and sealed drawings to the CITY. The ENGINEER shall meet with the CITY Building Department, if necessary. The ENGINEER shall make appropriate changes to the plans as required by the CITY's Building Department. Eight (8) additional signed and sealed sets will be prepared for Building Permits.

The ENGINEER shall prepare and submit an opinion of probable construction cost.

The ENGINEER shall attend one (1) meeting with the CITY to review the Draft Contract Documents and shall prepare meeting minutes.

- 3.7 Based on the CITY's review of the Draft Contract Documents, the ENGINEER shall finalize the Contract Documents (100% complete) and submit eight (8) sets of blueprints plus one (1) set of reproducible vellums to the CITY with a final opinion of probable construction cost. The ENGINEER shall sign and seal two (2) sets of reproduced Contract Documents when notified by the CITY. The ENGINEER will also distribute the Plans to the private utility companies.

4.0 Permitting/ Coordination with Agencies

- 4.1 The ENGINEER shall prepare and submit the FDEP permit application.

5.0 Bidding and Contract Award

- 5.1 The ENGINEER shall prepare the Advertisement for review by the CITY. The CITY will place the Advertisement in the newspaper of their choice.

- 5.2 The ENGINEER shall distribute the Contract Documents to the Dodge Room.
- 5.3 The ENGINEER shall attend one (1) pre-bid meeting.
- 5.4 The ENGINEER shall answer technical questions during the bid period and shall prepare and submit a log of any comments and questions received from contractors.
- 5.5 The ENGINEER shall assist the CITY in preparing addenda, if necessary.
- 5.6 The ENGINEER shall attend one (1) Bid Opening.
- 5.7 The ENGINEER shall review the bids, investigate the bidders and submit a Letter of Recommendation to the CITY regarding the Award of the Contract.
- 5.8 The ENGINEER shall conduct the Pre-Construction Meeting.
- 5.9 The ENGINEER shall review the Schedule of Values and Project Schedule.
- 5.10 The ENGINEER will review shop drawings submitted by the selected contractor to ensure compliance with the Engineer's design.
- 5.11 The ENGINEER shall address re-submittals.
- 5.12 The ENGINEER shall conduct periodic visits to the Project site.
- 5.13 The ENGINEER shall address questions from the contractor during construction.
- 5.14 The ENGINEER shall develop a Final Punch list.

III. SCHEDULE

<u>Task</u>	<u>Description</u>	<u>Number of Weeks for Completion (excluding Review Time)</u>
1.0	Data Collection / Review	3
2.0	Preliminary Design	6
3.0	Intermediate/ Final Design	8
4.0	Permitting/ Coordination with Agencies	As Required
5.0	Post Design Services	As Required

IV. CITY RESPONSIBILITIES

The CITY will provide the following for the ENGINEER:

1. Copies of all available maps, plats, aerial photographs, record drawings, operating logs, maintenance files and other available information and data pertinent to the project design;
2. Personnel and equipment to provide access during site inspections and draw down testing;
3. Acquire right-of-way and easements, including construction easements, as necessary;
4. Pay all permit application and review fees;
5. Distribute submittals (Preliminary, 60%, 90% and 100% Plans) to CITY Departments, as necessary;
6. Provide City staff reviews;
7. Coordinate and place advertisement for bids

V. ENGINEER'S COMPENSATION

For the detailed Scope of Work described under Tasks 1 through 5 above, the CITY will compensate the ENGINEER on a Lump Sum, Not-to-Exceed price basis in the amount of \$ 90,710.00.

VI. STAFF ASSIGNMENT (Consultant):

William Reidy, P.E.

Daniel Stowers, P.E.

VII. SPECIAL CONSIDERATIONS

I hereby certify as a licensed Professional Engineer, registered in accordance with Florida Statute 471 (481) that the above project's site and/or construction plans, to the best of my knowledge, information, and belief, will meet applicable design criteria specified by City municipal ordinance, State, and Federal established standards. I understand that it is my responsibility as the project's Professional Engineer, to perform a quality assurance review of these submitted plans.

CITY OF TREASURE ISLAND AGENDA COVER MEMORANDUM

Agenda Item #: *E4*
Meeting Date: 2-21-06

SUBJECT: Cross Walk Regulations and Education Program

RECOMMENDATION: Informational Only

SUMMARY:

At the last Commission meeting the Commission requested that Administration place an item on the next workshop regarding cross walk regulations and safety and have a representative of the Police Department available to explain what the current regulations and enforcement penalties are for the pedestrian cross walks in Treasure Island, particularly along Gulf Boulevard.

A member of the Police Department will be available to brief the Commission. Also staff has attached a brochure that St. Petersburg is using that was prepared by FDOT regarding cross walk safety.
