Isle of Capri Water Booster Station Improvements Project

Steve Soltau, Operations Division Director, Pinellas County Utilities
Thomas Pugh, P.E., Regional Engineering Manager, McKim & Creed
Booster Station Dedicated in 1979

Built for growth, built to last

- 5-million-gallon water storage tank
- 24-inch-thick structural floor slab
- 1,000-5,000 gallon per minute pumping capacity
- 13 million gallons per day at 50-60 psi
Preserving Green Space

Forward-thinking County leaders created park-like passive recreation to preserve green space
Improving Service & Reliability
Key Improvements

Increasing pumping capacity to meet projected future demands

Raising critical electrical equipment above a 17-foot storm surge level

Installing new pumps, motors, valves, piping and electrical components to replace aging equipment and infrastructure
Architectural Improvements
Minimizing Inconvenience

Construction begins November 2019

Expected to be completed in Spring 2021

Limiting Noise

Monday through Saturday, 7:00 a.m. – 6:00 p.m.

Bypass and dewatering pumps

- Bypass pumping will only be used to maintain drinking water pressure; only during peak demands, 8-10 hours per day
- Quiet generators/enclosures if needed overnight
North End of Park Closed
Reduced Parking
Traffic Safety

Increased traffic to/from Isle of Capri

Temporary lane closures

- Intermittent
- Clearly marked
- Flaggers onsite to direct traffic
